EDUCATION

MSc in DevOps (in progress)

UNIR | Expected 2026

Higher Technician in Systems and Network Administration

Universae | Jun 2024

Bachelor's Degree in Business and Commerce + Master's in Digital Marketing

Complutense University of Madrid
Sep 2020

CERTIFICATIONS

- eJPT – Junior Penetration Tester (INE Security)
- ICCA – INE Certified Cloud Associate (INE Security)
- CompTIA Security+

TECHNICAL SKILLS

- **IaC & Automation:** Terraform, Ansible, PowerShell, Bash, Python
- **Cloud & Virtualisation:** AWS, VMware vSphere, Hyper-V
- **Containers & CI/CD:** Docker, Docker Compose, GitHub Actions, Git, Kubernetes (basics)
- **Networking & Security:** Firewalls (WatchGuard), TLS/PKI (OpenSSL), IAM, Active Directory, Wireshark
- **OS:** Linux, Windows Server
- **Tools:** Jira, M365, Acronis

LANGUAGES

Spanish: Native
English: IELTS B2+

Marcos Pérez Cantero

INFRASTRUCTURE & SECURITY | DEVOPS

ABOUT ME

Infrastructure & Security Specialist at GMV, moving into DevOps and Cloud. I troubleshoot networks down to the packet level, automate the deployment of test environments with Terraform, Ansible, PowerShell and Bash, and bring a security-first mindset to everything I build. Previous experience with AWS environments and multi-site connectivity. eJPT, ICCA and CompTIA Security+ certified, currently completing a Master's in DevOps (UNIR). Business background that makes stakeholder communication easy.

WORK EXPERIENCE

Infrastructure & Security Specialist

GMV | Sep 2025 – Present

- Troubleshoot network and protocol issues in cross-domain security solutions for national and international clients (TCP/UDP, NTP, mail, file transfer), down to packet level with Wireshark.
- Automate the deployment of virtualised test environments on VMware vSphere with Terraform, Ansible, PowerShell and Bash for fast, reproducible validation.
- Evaluate and integrate new technologies, adapting protocol behaviour to each solution's requirements.
- Manage the TLS/PKI certificate lifecycle (OpenSSL, Windows PKI) and validate deployments across Windows and Linux.
- Work directly with clients to translate requirements into technical solutions; agile workflow (Jira) with international teams.

IT Systems & Cybersecurity Administrator

Dicop Consulting | Feb 2024 – Sep 2025

- Built and configured AWS environments and virtual networks; connected offices across the country with reliable, low-latency multi-site links.
- Administered WatchGuard firewalls and proxies: complex rulesets, segmentation and content filtering.
- Centralised identity with Active Directory and M365 across hybrid environments.
- Automated IT operations with Python and PowerShell (user provisioning, log analysis).
- Designed hybrid backup and disaster-recovery strategies (Acronis, EDR); ran regular infrastructure security audits.

Data Analyst

BBDO & Proximity | 2021 – 2023

- Collected, cleaned and analysed web traffic data with SQL and Google Analytics to drive business decisions.
- Built and maintained web applications; presented data-driven insights that translated technical metrics into business strategy.
